

What is Poly-MVA?

Results have been released demonstrating the effectiveness of palladium lipoic complexes (referred to as PdLA and its dietary supplement version, Poly-MVA), a safe nutritional approach for cancer - a disease that according to U.N. and American Cancer Society surveys affects some 2 billion people worldwide.

In a multiple cell line study, Poly-MVA was shown to be immediately effective against numerous cancer cell lines measured over 72 hours: melanoma, liver, lung, breast, colon, astrocytoma and glioblastoma. In the prostate cancer line, there was no cell death at 24 hours, but there was tumor cell death seen at 48 hours. One significant benefit of Poly-MVA is that it can be continued indefinitely. Research shows the best results appear to be achieved when it is taken for periods of time of 3 months or greater.

A patented supplement with over 17 years of testing and clinical research, and over 40 years of laboratory research, Poly-MVA is a nutritional supplement that is uniquely formulated combination of minerals, vitamins and amino acids designed to increase cellular energy production, promote overall health and protection, and support immune system function - particularly in compromised body states.

Poly-MVA is prepared using a unique method that complexes the ingredients and produces a compound that is safe, effective and supports and protects healthy cells.

Al Sanchez, Jr., the company's President and CEO, is excited at the continuing evidence showing the effectiveness of Poly MVA with cancer patients.

"It has been shown through scientific research, case studies, clinical application, practitioner reports and individual responses that Poly-MVA supports and improves cellular function and has far-reaching positive effects on many systems and functions of the body. Its most notable effects have been with cancer patients, but others are having wonderful results as well," he commented. "The results of the KGK cell lines are further confirming the important role Poly-MVA can have in directly supporting those dealing with cancer."

For more information on Poly-MVA, visit www.polymva.com.

How Can Poly-MVA Help?

- Helps the body to produce energy
- Supports the liver in removing harmful substances from the body
- Assists in preventing cell damage
- Assists the body in removing heavy metals from the bloodstream
- Works as a powerful antioxidant and detoxificant
- Prevents B-12 deficiency related mental disturbances in the elderly
- Supports nerve and neurotransmitter function
- Enhances white blood cell function
- Supports pH balance, helping to maintain oxygenation of cells and tissues

Note: Poly-MVA is marketed as a dietary supplement therefore we can not make claims that it treats or cures any disease. All of the information we share in this email comes from scientific research and field reports from our Health Care Practitioners and individuals who have used Poly-MVA.)
